Trabajo Práctico 9

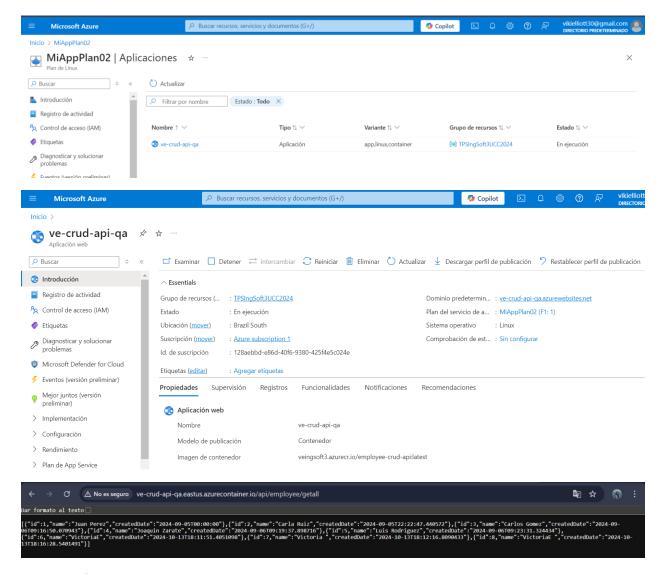

Implementación de Contenedores en Azure Parte 2

- 4.1 Modificar nuestro pipeline para incluir el deploy en QA y PROD de Imagenes Docker en Servicio Azure App Services con Soporte para Contenedores
- 4.1.1 Agregar a nuestro pipeline una nueva etapa que dependa de nuestra etapa de Construcción y Pruebas y de la etapa de Construcción de Imagenes Docker y subida a ACR realizada en el TP08

Agregar tareas para crear un recurso Azure Container Instances que levante un contenedor con nuestra imagen de back utilizando un AppServicePlan en Linux

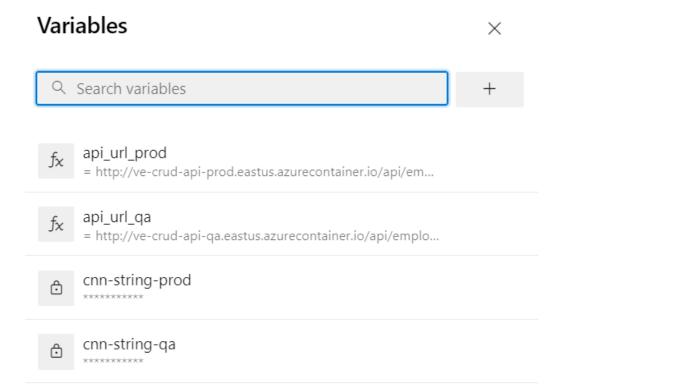

4.2 Desafíos:

 4.2.1 Agregar tareas para generar Front en Azure App Service con Soporte para Contenedores

48 WebAppFrontNameContainersQA: 've-crud-front-qa'

```
